Junior Backend Engineer

Builds and tests .NET APIs; shipped two production services in her first year

SKILLS

C#, .NET 8, ASP.NET Core · PostgreSQL, Entity Framework Core · REST API design · xUnit, Testcontainers · Docker, GitHub Actions · Azure App Service · Git

PROFESSIONAL EXPERIENCE

Brightline Software d.o.o. – Junior Software Engineer, Novi Sad, Serbia *Sep 2024 – Present*

- Built a shipment-tracking API in ASP.NET Core that serves 1,200 requests per minute at 120 ms p95.
- Cut the test suite from 14 to 5 minutes by moving integration tests to Testcontainers.
- Fixed 40+ production bugs from the support queue and wrote the runbook the on-call team now uses.
- Shipped a second service, invoice export, from design review to production in six weeks.

Datalab Systems d.o.o. – Software Engineering Intern, Novi Sad, Serbia *Feb 2024 – Jul 2024*

- Added CSV and Excel export to an internal reporting tool used by 300 employees.
- Wrote 120 unit tests, raising coverage of the billing module from 35% to 78%.

SELECTED PROJECTS

Budget Buddy (github.com/ana-example/budget-buddy) *C#, Blazor, SQLite*

- Personal finance tracker with bank CSV import; 40 GitHub stars and 6 outside contributors.

Open-source contributions *C#*

- Two merged pull requests to an open-source .NET logging library: a date-formatting fix and its docs.

EDUCATION

- **B.Sc. in Software Engineering** – University of Novi Sad, 2024 (GPA 9.1/10)

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)
